

CNIC receives a donation to investigate Hutchinson-Gilford progeria syndrome

11/05/2024

The Molecular and Genetic Cardiovascular Pathophysiology Laboratory headed by Dr Vicente Andrés at CNIC received a donation of 11,060 euros from the Alexandra Peraut Progeria Association for its research project into the Hutchinson-Gilford progeria syndrome (HGPS), an ultra-rare genetic disease that affects 1 in every 20 million people.
