Universidad Autónoma de Madrid	PhD	01/2020	Molecular Biosciences
Centro Nacional de Investigaciones Cardiovasculares (CNIC)		Present	Heart development

A. Personal Statement

I have worked in research related to heart development and congenital heart diseases for ten years, focusing mainly in signaling pathways and genetics. I aim to improve the knowledge of the mechanisms involved in the pathogenesis of cardiac defects in order to better diagnose or alleviate them, by using murine models based on human genetics evidence such as GWAS, RVAS and WGS data. My publication record includes 6 research papers, with 5 collaborations and one of them as first author, and a h-index of 5 in Scopus. I am involved in the supervision of two PhD candidates and I have supervised three MSc students. I also take part in science dissemination programs such as *Noche de los Investigadores* and *Semana de la Ciencia*.

B. Positions, Scientific Appointments, and Honors

Postdoctoral fellow. 2020-Present at Intercellular Signaling in Cardiovascular Development and Disease lab at CNIC.
